Art Unit: 3679

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 13, 14 and 15, drawn to a rivet, classified in class 411.
- II. Claims 10-12, drawn to a method riveting, classified in class 29.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the rivet does not require the combination with the workpieces wherein the apertures therein are filled by the rivet.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Velpman on 9-26-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
